The full surface: the crew strip, the scenario picker, the escalation handoff packet and the operator trace are all on. The customer-facing build at / is the same application with those switched off.

Test cases — NovaMart run sheet (.xlsx)

23 scenarios with the order and customer ids to type, the status and specialist each one should reach, and what it proves. Three sheets: Run sheet, Coverage, Setup.

Ids in the run sheet are rows in the demo fixture, not real customers. Pick a scenario from the dropdown below to fill the form, then press Run — nothing sends itself.

Ticket STUB-2F31BF73 is open with our support team. It references order 45923. Reason: ungrounded. A human will pick this up — I'd rather hand this over than answer from anything I can't check.

YOU

does it have a pen

● ASSISTANT

No — your order 45923 contains the 4 items I listed before: an outerwear jacket, running shoes, another outerwear jacket, and headphones. No pen.
